

Delaware North – Caterers to the Australian Open Tennis, roll out Inzenius across all its Australian businesses following a most successful 2010 event.

Delaware North's 2010 Australian Open was one of the most successful thanks in part to Inzenius. The company has since decided to roll out Inzenius including, payroll across all its Australian business of over 7,000 employees.

“Inzenius streamlined the process of staff management. It allows for the range of costing and rostering processes including rosters being automatically built based on the event attendance and times, web based employee roster notification, acceptance, attendance validation back to the planned roster through to automated payroll production in one application.” Phil Batty, Director of IT

Employee times are captured and approved at each work point from the point of sale, swipe or remote system for comparison to rosters prior to automated payroll production. Labour costings are processed daily using the Inzenius Award Interpreter, comparing the rostered costs to budget and authorised times. This unique Inzenius feature ensures a vastly improved labour outcome at each venue and event.

“Inzenius’ project people knew the venue industry guiding our team to consider new and better ways of doing things.” Phil said.

Inzenius is a suite of software products that are particularly suited for multi-site businesses providing a seamless single code based enterprise level application that can easily scale for larger organizations.
